## The Company

Alongside our many specialised solutions for automotive manufacturers, we also offer comprehensive solutions and services for the aftermarket. Spare parts of matching quality, supplied with the experience and proven expertise of an OEM supplier are a particular strength. Our comprehensive range of spare parts of matching quality is readily available and is synonymous with a perfect fit, simple installation and consistently reliable quality, offering significant advantages for distributors, workshops and consumers alike.

## Das Unternehmen

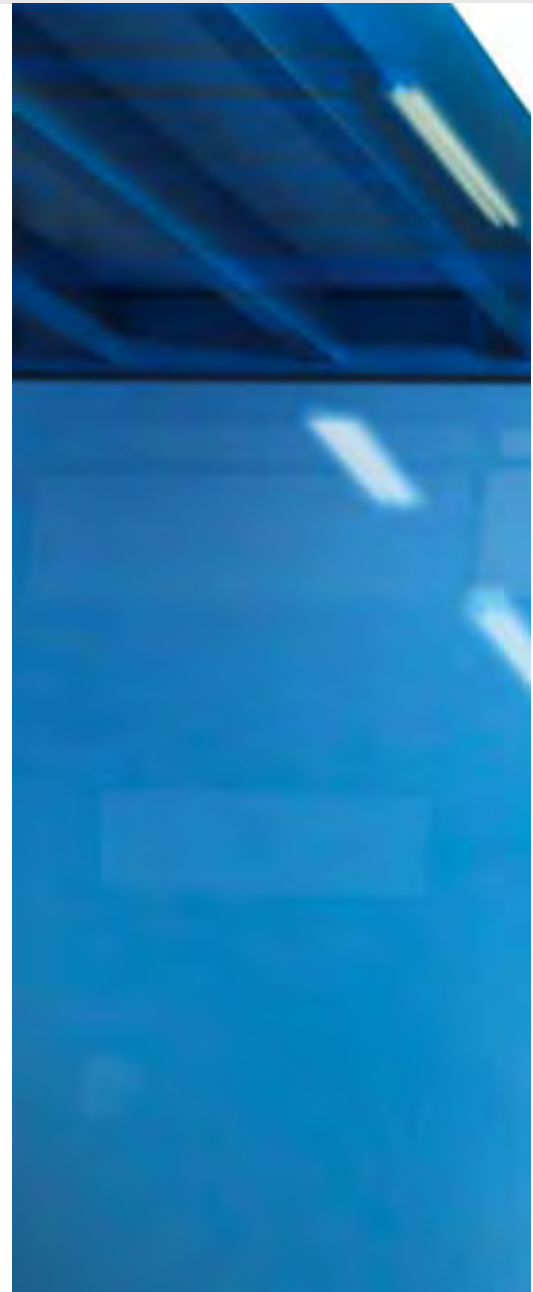

Neben unseren speziellen und vielfältigen Lösungen für Automobilhersteller bieten wir umfassende Lösungen und Serviceaktivitäten für den Aftermarket. Hierzu zählen insbesondere qualitativ gleichwertige Ersatzteile, die wir mit dem Wissen und der langjährigen Kompetenz eines Erstausrüsters anbieten. Das umfassende und zeitnah verfügbare Leistungsspektrum an Ersatzteilen steht für Passgenauigkeit, einen einfachen Einbau sowie gleichbleibende Qualität. So bieten qualitativ gleichwertige Ersatzteile Großhändlern, Werkstätten und Endkunden gleichermaßen deutliche Vorteile.

## L'entreprise

Parallèlement à nos solutions particulières et multiples pour les constructeurs automobile nous offrons des solutions et des activités de service étendues pour l'Aftermarket (marché de pièces de rechange et d'accessoires). En font partie en particulier les pièces détachées qualitativement équivalentes que nous proposons avec le savoir et la compétence de longue durée d'un premier équipementier de série. La gamme étendue de fournitures, disponibles à brève échéance, de pièces détachées représente la précision de l'assemblage, un montage simple ainsi qu'une qualité constante. Ainsi les pièces détachées qualitativement équivalentes offrent des avantages nets de la même manière aux grossistes, aux garages et aux clients finaux.

## Nuestra empresa

Además de las soluciones especiales y variadas que producimos para fabricantes de automóviles, ofrecemos numerosas soluciones y actividades de servicio para el mercado postventa. Entre éstas destacan en particular los recambios de calidad equivalente, que ofrecemos al mercado con los conocimientos y el nivel de competencia, forjados durante muchos años, de un fabricante de primeros equipos. Nuestro amplísimo espectro de recambios, disponibles al poco tiempo de aparecer en cada modelo de automóvil, se caracterizan por su precisión de ajuste, su montaje sencillo y su calidad constante. Por ello, los recambios de calidad equivalente suponen por igual claras ventajas para mayoristas, talleres y clientes finales.

## La società

Oltre a numerose soluzioni specializzate per i produttori di automobili offriamo soluzioni e servizi ad ampio spettro per il settore aftermarket (pezzi di ricambio e accessori). Tra questi rientrano in particolare pezzi di ricambio qualitativamente equivalenti che offriamo con il know-how e l'esperienza pluriennale di un fornitore OEM. La vasta gamma di pezzi di ricambio rapidamente disponibili rappresenta una soluzione ottimale, facilmente installabile e di qualità costante. I pezzi di ricambio qualitativamente equivalenti offrono pertanto ai distributori, alle officine e ai clienti finali notevoli vantaggi.

## Компания

Помимо узкоспециальных и широкопрофильных решений для автопроизводителей мы готовы предложить комплексные решения, включая набор сервисных операций, для послепродажного обслуживания автомобилей. В частности, по качеству равноценные оригинальным запасные части, которые мы, как предприятие-изготовитель, предлагаем партнерам на базе наших знаний и многолетнего опыта. С учетом широкого спектра услуг и возможности поставок в кратчайшие сроки гарантирована точность изготовления изделий, простой монтаж и стабильное качество производства. Поэтому приобретая по качеству равноценные оригинальным запасные части у нас, оптовые покупатели, промышленные предприятия и конечные пользователи в одинаковой степени получают очевидные преимущества.

## Oxygen Sensors

It pays to invest in quality

The existing portfolio of sensors for engine management is optimally complemented by the inclusion of Oxygen Sensors, with which the best possible engine power is attained at the lowest possible fuel consumption. The measurements from an Oxygen Sensor are required to ensure that the catalytic converter converts almost all pollutant exhaust that results when fuel is combusted. Oxygen Sensors determine the amount of residual oxygen in the exhaust and transmit this value to the engine control system, which in turn precisely sets the composition of the mixture using the transmitted values. Only with this ideally combined mixture of air and fuel can we achieve an almost complete conversion of environmentally-friendly exhaust. Our Oxygen Sensors guarantee optimum engine performance, whilst complying with existing emission values.

## Lambdasonden

Qualität die sich auszahlt

Das bestehende Portfolio der Sensoren für Motormanagement wird durch die Aufnahme der Lambdasonden optimal ergänzt, wodurch die bestmögliche Leistungsentfaltung des Motors bei gleichzeitigem minimalen Kraftstoffverbrauch erreicht wird. Damit der Katalysator nahezu alle schädlichen Abgase umwandeln kann, die bei einer Verbrennung von Kraftstoff entstehen, werden die Messergebnisse der Lambdasonden benötigt. Lambdasonden bestimmen den Restsauerstoff-Anteil im Abgas und übermitteln diesen Wert an die Motorsteuerung, welche die Gemischzusammensetzung mit Hilfe des übermittelten Wertes exakt einstellt. Nur mit einem ideal eingestellten Gemisch von Luft zu Kraftstoff lässt sich eine fast vollständige Umwandlung in umweltverträgliche Abgase realisieren. Unsere Lambdasonden gewährleisten eine optimale Motorleistung bei gleichzeitiger Einhaltung vorgeschriebener Emissionswerte.

## Sondes lambda

Investir dans la qualité est rentable !

La gamme existante de capteurs pour la gestion du moteur est complétée de manière optimale par les sondes lambda qui permettent de développer la puissance maximale du moteur pour une consommation minimale de carburant. Les résultats des mesures des sondes lambda sont requises pour que le pot catalytique puisse convertir pratiquement tous les gaz d'échappement nocifs produits lors de la combustion d'un carburant. Les sondes lambda déterminent le taux d'oxygène résiduel dans les gaz d'échappement et transmettent cette valeur à la commande du moteur, qui règle avec précision la composition du mélange à l'aide de la valeur transmise. C'est seulement avec un mélange d'air et de carburant réglé de manière idéale que peut être réalisée une conversion quasi intégrale en gaz d'échappement compatibles avec l'environnement. Nos sondes lambda garantissent une performance optimale du moteur tout en respectant les valeurs d'émission prescrites.

## Sonde lambda

La qualità che ripaga

L'attuale gamma di sensori per la gestione del motore viene completata in modo ottimale dalle sonde lambda, con le quali si ottiene il massimo rendimento del motore con il minimo consumo di carburante. Affinché il catalizzatore possa trasformare quasi tutte le emissioni nocive della combustione del carburante, occorrono i valori di misura rilevati dalle sonde lambda. Le sonde lambda determinano la percentuale di ossigeno residuo dei gas di scarico e trasmettono questo valore alla centralina di controllo del motore, che regola precisamente la composizione della miscela in base al valore trasmesso. Soltanto con una miscela di aria e carburante regolata in modo ideale è possibile realizzare una quasi completa conversione delle sostanze tossiche dei gas di scarico in emissioni ecocompatibili. Le nostre sonde lambda garantiscono prestazioni ottimali del motore nel pieno rispetto dei valori limite di legge delle emissioni allo scarico.

## Sondas lambda

Vale la pena invertir en calidad

La cartera existente de sensores para la gestión del motor se complementa de forma óptima a través de la adopción de las sondas lambda, consiguiéndose así el mejor desarrollo posible de la potencia del motor reduciendo al mismo tiempo a un mínimo el consumo de combustible. Para que el catalizador pueda convertir prácticamente la totalidad de los gases tóxicos de escape producidos durante la combustión del carburante, son imprescindibles los resultados de medición de las sondas lambda. Éstas determinan la proporción residual de oxígeno en los gases de escape, transmitiendo este valor a la unidad de mando del motor, que a su vez ajusta con precisión la riqueza de la mezcla basándose en el valor transmitido. Una transformación casi completa de los gases de combustión tóxicos en gases de escape de bajo impacto medioambiental sólo será posible a través de un ajuste ideal de la mezcla aire/carburante. Nuestras sondas lambda garantizan un rendimiento óptimo del motor y, a su vez, el cumplimiento de los valores de emisión prescriptivos.

## Кислородные датчики

Качество окупается

Существующий портфолио датчиков для управления двигателем оптимально дополняется включением кислородных датчиков, в результате чего достигается максимально возможное развитие мощности двигателя при одновременном минимальном расходе топлива. Чтобы катализатор мог преобразовать почти все вредные ОГ, которые образуются при сжигании топлива, требуются результаты измерений кислородных датчиков. Кислородные датчики определяют долю остаточного кислорода в ОГ и передают это значение блоку управления двигателем, который точно регулирует состав смеси с помощью переданного значения. Только при идеально отрегулированной смеси воздуха с топливом удастся реализовать почти полное преобразование в экологически безвредные ОГ. Наши кислородные датчики гарантируют оптимальную мощность двигателя при одновременном соблюдении предписанных показателей по выбросам вредных веществ.

## VDO Oxygen Sensor range

Our Oxygen Sensors ensure high-quality, simple and fast 1-to-1 replacement. They are optimally matched to the respective vehicle models, meaning that shortening cables or changing connectors is not necessary.

The Oxygen Sensor range includes the following sensor types:

## VDO Lambdasondenprogramm

Unsere Lambdasonden gewährleisten einen qualitativ hochwertigen, einfachen und schnellen 1 zu 1 Austausch. Sie sind optimal auf die jeweiligen Fahrzeugtypen abgestimmt, wodurch z.B. ein Kürzen der Kabel oder Wechseln der Stecker nicht notwendig ist.

Das Lambdasonden-Programm umfasst die folgenden Sonden-Typen:

## Gamme de sondes lambda VDO

Nos sondes lambda garantissent un échange un à un de grande qualité, simple et rapide. Elles sont adaptées de manière optimale à chaque type de véhicule, si bien qu'un raccourcissement des câbles ou un remplacement des connecteurs, par exemple, n'est pas nécessaire. La gamme de sondes lambda comprend les types de sonde suivants :

## Programma di sonde lambda VDO

Le nostre sonde lambda garantiscono una sostituzione 1 a 1 di alto valore qualitativo, semplice e rapida. Sono studiate in modo ottimale per i vari tipi di veicolo, motivo per cui non è necessario per esempio accorciare i cavi o sostituire i connettori.

Il programma di sonde lambda comprende i seguenti tipi di sonda:

## Gama de sondas lambda VDO

Nuestras sondas lambda garantizan un recambio parejo sencillo, rápido y de alta calidad. Están perfectamente adaptadas a los tipos de vehículo respectivos, por lo que no es necesario recortar cables o cambiar clavijas.

La gama de sondas lambda abarca los siguientes tipos de sondas:

## Программа кислородных датчиков VDO

Наши кислородные датчики обеспечивают высококачественную, простую и быструю замену 1 к 1. Они оптимально адаптированы к соответствующим типам автомобилей, благодаря чему не требуется, например, укорачивание кабелей или замена штекеров.

Программа кислородных датчиков охватывает следующие типы датчиков:

### Unheated Oxygen Sensors

Unheated Oxygen Sensors were used when exhaust regulation systems were introduced. They are located near the engine so that the sensor reaches its operating temperature quickly.

### Unbeheizte Lambdasonden

Zu Beginn der Abgasregelung wurden unbeheizte Lambdasonden eingesetzt. Damit die Sonde schnell ihre Betriebstemperatur erreicht, ist sie in der Nähe des Motors verbaut.

### Sondes lambda non chauffées

Des sondes lambda non chauffées étaient utilisées dans les débuts de la régulation des gaz d'échappement. Pour que la sonde atteigne rapidement sa température de service, elle est montée à proximité du moteur.

### Sonde lambda non riscaldate

All'inizio della regolazione dei gas di scarico sono state impiegate sonde lambda non riscaldate. Per far sì che la sonda raggiunga velocemente la sua temperatura d'esercizio, essa è montata vicino al motore.

### Sondas lambda sin calefactor

Al principio de la regulación de los gases de escape se utilizaban sondas lambda sin calefactor. Para que la sonda alcance con rapidez su temperatura de servicio, ésta se monta en las proximidades del motor.

### Неподогреваемые кислородные датчики

В первоначальный период регулировки ОГ применялись неподогреваемые кислородные датчики. Чтобы датчик быстро достигал своей рабочей температуры, он устанавливался вблизи двигателя.

### Heated Oxygen Sensors (3 and 4 pin)

The integrated heater ensures that the required operating temperature is reached shortly after a cold start, allowing for emission-optimized operation even in the warm-up phase of the engine. For this reason, these sensors do not need to be located near to the engine.

### Beheizte Lambdasonden (3 und 4 polig)

Die eingebaute Heizung gewährleistet die erforderliche Betriebstemperatur bereits kurz nach dem Kaltstart, wodurch schon in der Warmlaufphase des Motors ein emissionsoptimierter Betrieb erreicht wird. Die direkte Nähe zum Motor ist somit nicht notwendig.

### Sondes lambda chauffées (à 3 et 4 pôles)

Le chauffage incorporé garantit la température de service requise peu après le démarrage à froid, si bien qu'une marche optimisée en émissions est atteinte dès la phase d'échauffement du moteur. Ainsi, la proximité immédiate du moteur n'est pas nécessaire.

### Sonde lambda riscaldate (a 3 e 4 poli)

Il riscaldamento incorporato garantisce la necessaria temperatura d'esercizio già poco dopo l'avviamento a freddo, per cui un esercizio ottimizzato in termini di emissioni è raggiunto già nella fase di riscaldamento del motore. In questo modo non è necessaria l'immediata vicinanza con il motore.

### Sondas lambda con calefactor (3 y 4 polos)

El calefactor incorporado garantiza la temperatura de servicio necesaria poco después del arranque en frío, por lo que se consigue un funcionamiento con optimización de las emisiones durante la fase de calentamiento del motor. Ya no es necesaria la proximidad directa al motor.

### Подогреваемые кислородные датчики (3- и 4-полюсные)

Встроенный подогрев обеспечивает необходимую рабочую температуру уже через короткое время после холодного пуска, в результате чего достигается оптимизация регулировки ОГ еще на стадии прогрева двигателя. Тем самым непосредственная близость к двигателю не требуется.

## Planar Oxygen Sensors

Planar Oxygen Sensors are an advanced version of the aforementioned sensors although their mode of operation is the same in principle. The main difference is that the measuring cell is smaller and can thus be heated more quickly. The required operating temperature is thus reached even more quickly.

## Planar-Lambdasonden

Planar-Lambdasonden sind eine Weiterentwicklung der bereits erwähnten Sonden, wobei die Arbeitsweise im Prinzip vergleichbar ist. Der größte Unterschied liegt allerdings darin, dass die Messzelle kleiner und somit schneller zu beheizen ist. Die notwendige Betriebstemperatur wird also noch schneller erreicht.

## Sondes lambda planaires

Les sondes lambda planaires sont un perfectionnement des sondes déjà mentionnées, le mode de fonctionnement étant comparable quant au principe. Mais la grande différence réside dans le fait que la cellule de mesure est plus petite, et se chauffe donc plus rapidement. Ainsi, la température de service requise est atteinte encore plus rapidement.

## Sonde lambda planari

Le sonde planari sono un perfezionamento delle sonde già menzionate, mentre il principio di funzionamento è in linea di massima analogo. La differenza significativa consiste tuttavia nel fatto che la cellula di misura è più piccola e può quindi riscaldarsi più velocemente. La temperatura d'esercizio richiesta viene perciò raggiunta ancora più in fretta.

## Sonda lambda planar

Las sondas lambda planares son un desarrollo ulterior de las sondas ya mencionadas; básicamente, el principio funcional es comparable. Sin embargo, la mayor diferencia reside en que la célula de medición es más pequeña y, en consecuencia, se calienta con mayor rapidez. La temperatura de servicio necesaria se alcanza aún más rápido.

## Планарный кислородный датчик

Планарные кислородные датчики являются усовершенствованием уже упомянутых датчиков, причем их принципы работы сравнимы. Самое большое отличие состоит во всяком случае в том, что измерительный элемент меньше и тем самым быстрее подогревается. Таким образом, необходимая рабочая температура достигается еще быстрее.

### Broadband sensors

Broadband sensors are designed like the planar sensors but, in contrast to all previous Oxygen Sensors, consist of two measuring cells. They can therefore be used in engines which operate with different mixing ratios. They can also be used in diesel engines.

### Breitband-Sonden

Breitband-Sonden sind wie die Planar-Sonden aufgebaut, bestehen aber im Vergleich zu allen bisherigen Lambdasonden aus zwei Messzellen. Sie kann somit bei Motoren eingesetzt werden, die mit unterschiedlichen Mischungsverhältnissen laufen. Zusätzlich kann sie in Dieselmotoren zum Einsatz kommen.

### Sondes à large bande

Les sondes à large bande ont la même structure que les sondes planaires, mais contrairement à toutes les sondes lambda utilisées jusqu'à présent, elles sont constituées de deux cellules de mesure. Elles peuvent donc être utilisées avec des moteurs qui tournent sous des rapports de mélange différents. Elles peuvent être en outre mises en œuvre dans des moteurs diésel.

### Sonde a banda larga

Le sonde a banda larga hanno la stessa struttura delle sonde planari ma, rispetto a tutte le sonde lambda precedenti, sono costituite da due cellule di misura. Possono perciò essere impiegate con motori che funzionano con diversi rapporti di miscela. Possono inoltre essere impiegate nei motori diesel.

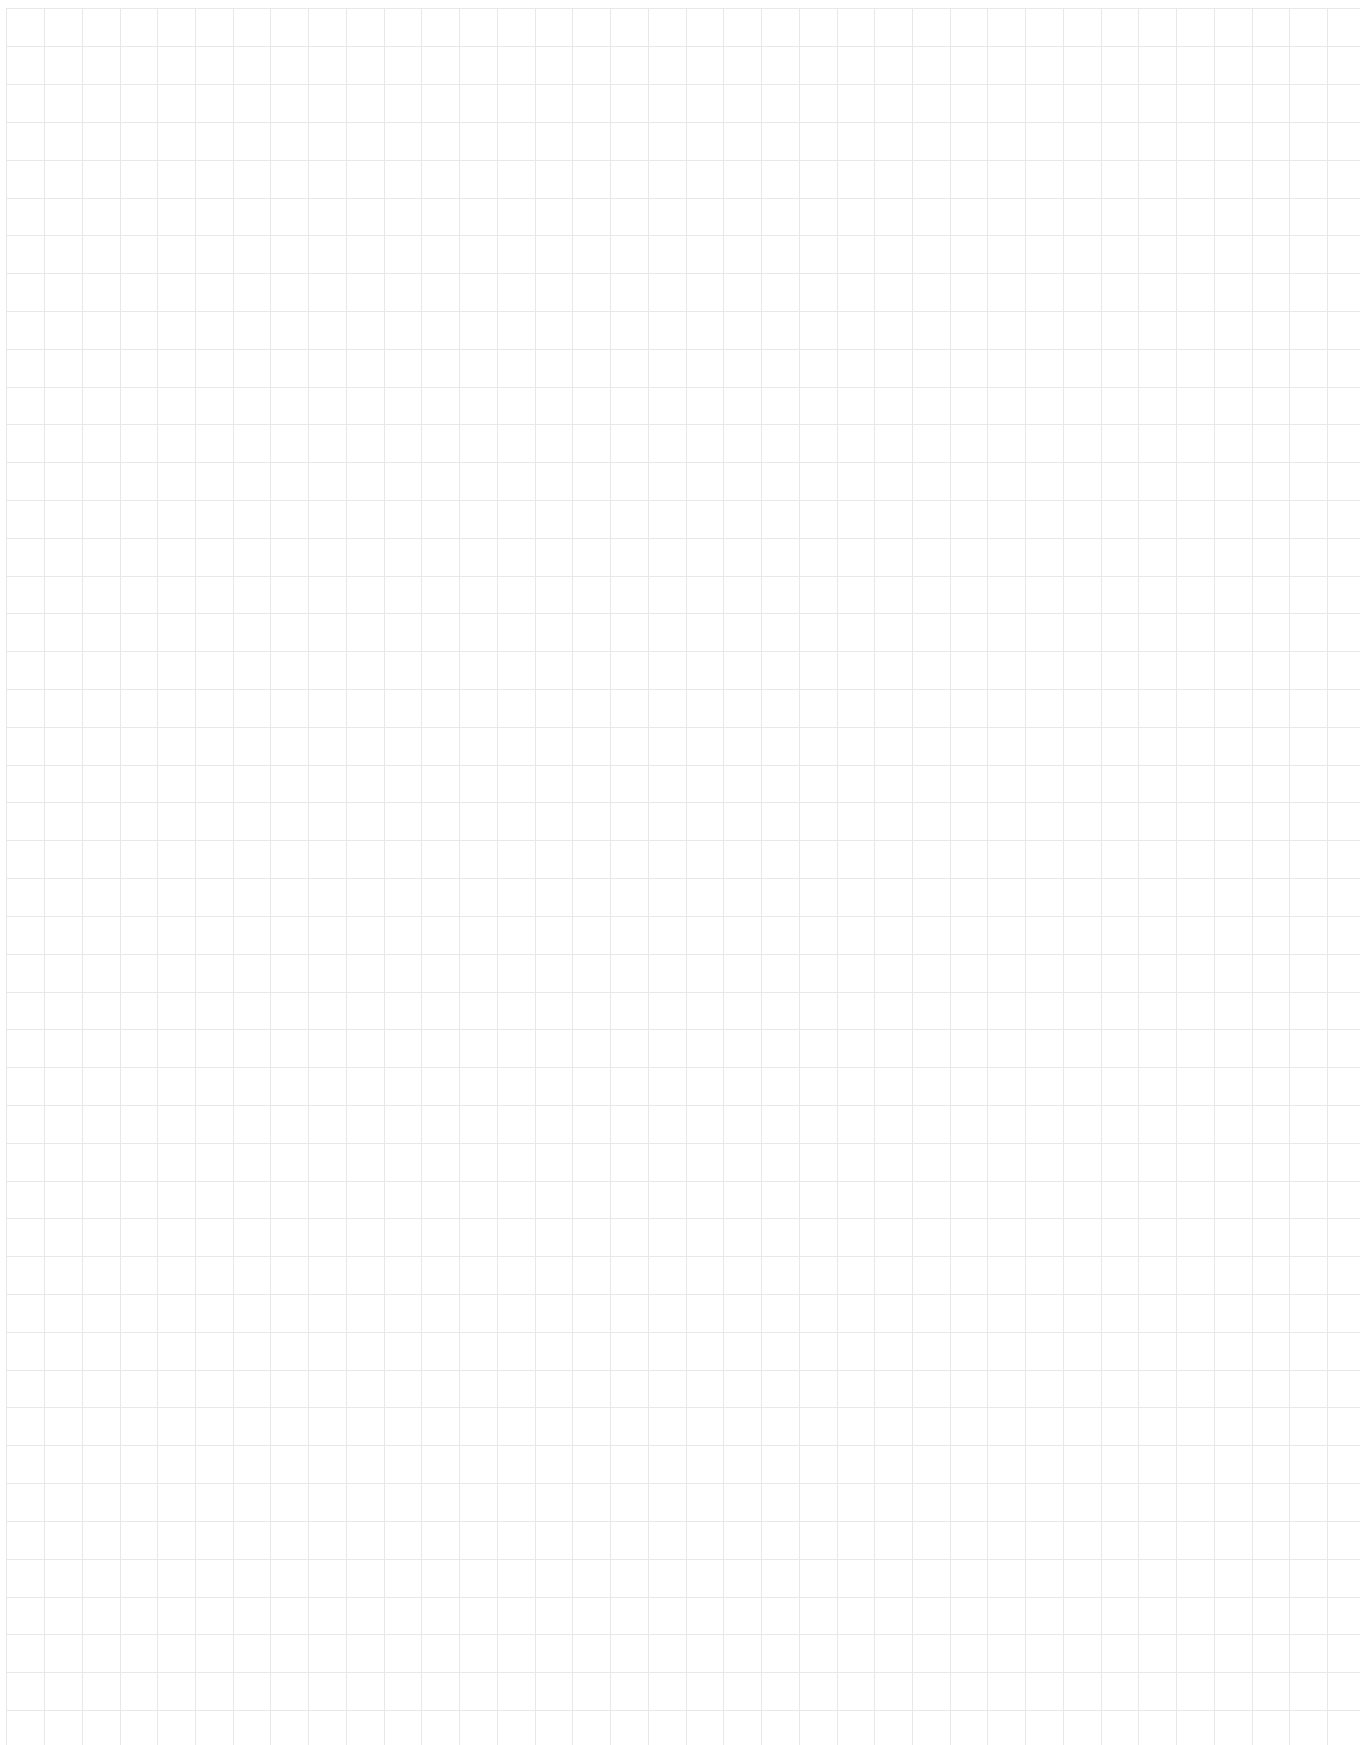

### Sonda de banda ancha

Las sondas de banda ancha presentan una estructura similar a las sondas planares, pero a diferencia de todas las sondas lambda ancestrales, éstas están formadas por dos células de medición. De esta forma puede utilizarse en motores que funcionen con diferentes proporciones de mezcla. Además, también pueden utilizarse en motores diesel.

### Широкополосный датчик

Широкополосные датчики устроены аналогично планарным датчикам, но в отличие от всех прежних кислородных датчиков они состоят из двух измерительных элементов. Тем самым они могут использоваться в двигателях, которые работают с различными соотношениями рабочей смеси. Дополнительно они могут использоваться в дизельных двигателях.
